

PRADEEP RAJ R

ColdFusion | React.js | React Native | 6+ Years Experience

Chennai, Tamil Nadu 600096 • rpredeepraj@gmail.com • +91 8428402482 • linkedin.com/in/pradeepraj-r-739a7a168

PROFESSIONAL SUMMARY

Results-driven software engineer with 6+ years of IT experience across two specialized roles: ColdFusion backend development at Mitrahsoft Technologies, and React.js and React Native frontend development at FarmwiseAI. Proven track record of delivering government-scale digital platforms, mobile applications, and enterprise tools. Skilled in API integration, performance optimization, and agile collaboration. Adept at mentoring junior engineers and driving high-quality software delivery on time.

CORE TECHNICAL SKILLS

ColdFusion / Backend: Adobe ColdFusion (CFML), CFScript, ColdFusion Components (CFCs), CF Scheduled Tasks, CF ORM, Application.cfc, CF Mail, CF File & Directory Operations, cfquery

Frontend & Mobile: React.js, React Native, JavaScript (ES6+), TypeScript, Redux, jQuery, HTML5, CSS3, Ant Design (Antd), Webpack, Babel

GIS & Mapping: OpenLayers (OLMap), GeoServer, Mapbox GL, GeoJSON API, Geofencing, Geo-tagging

Database & APIs: SQL, REST API Integration, Google Maps API, BillDesk Payment API, AI Image Recognition APIs

Cloud & DevOps: AWS Amplify, AWS S3, CloudFront, CloudWatch, AWS CodeCommit

Tools: GitHub, Jira, Visual Studio Code, Sublime Text, Notepad++, Antigravity

PROFESSIONAL EXPERIENCE

Senior Software Engineer – **FarmwiseAI Pvt Ltd** | Chennai

January 2021 – Present

- Joined as the founding engineer and built the company's complete React.js and React Native technology stack from the ground up, establishing frontend architecture and delivery workflows.
- Developed Cadastral Maps Digitization, Agre-X crop monitoring, AgriCart e-commerce, WRD mobile app, and Pest Detection — all for state government clients across Tamil Nadu and Telangana.
- Built and delivered React Native mobile applications for Android, including geofencing, interactive maps, AI image recognition, and bilingual support for rural farmer accessibility.
- Integrated AWS S3, Amplify, CloudFront, CloudWatch, and CodeCommit for scalable, secure cloud infrastructure across all products.
- Worked directly with government clients and product stakeholders to gather requirements, define UI/UX workflows, and ensure on-time delivery.
- Monitored application performance using AWS CloudWatch, identified bottlenecks, and implemented fixes that delivered a 30% improvement in efficiency.
- Mentored interns and junior engineers through code reviews, pair programming, and structured knowledge-transfer sessions on React and React Native best practices.

ColdFusion Developer – **Mitrahsoft Technologies Pvt Ltd** | Kovilpatti

January 2019 – January 2021

- Maintained and enhanced Raven SiteBuilder — a professional enterprise site planning application for FLIR Systems — managing ongoing ColdFusion (CFML) backend stability, bug resolution, performance tuning, and feature enhancements.
- Built robust ColdFusion Components (CFCs) to encapsulate business logic, manage application state via Application.cfc, and deliver reusable backend services.
- Integrated Google Maps API and thermal security camera simulation into the ColdFusion application, enabling real-time visual site planning for FLIR integrators.
- Implemented CF Scheduled Tasks for automated data sync, report generation, and maintenance jobs — reducing manual intervention by 40%.
- Designed and optimized SQL queries via ColdFusion ORM and cfquery, improving data retrieval performance and reducing page load times.
- Resolved critical CFML and server configuration defects in production, maintaining 99%+ application uptime for FLIR Systems SLA requirements.
- Mentored junior team members on CFML coding standards, ColdFusion debugging techniques, and application architecture patterns.

KEY PROJECTS

Pest Detection – AI-Driven Mobile Application

July 2025 – Present

Client: Department of Water Resources, Tamil Nadu **Tech:** React Native, Redux, TypeScript, Antigravity, AI Image Recognition APIs, Geo-tagging

- Implemented a React Native mobile application — a mobile-based AI-driven pest detection and expert advisory system designed to assist farmers with real-time pest detection and expert advisories.
- Using advanced image recognition, the app identifies pest and disease symptoms from uploaded photos and provides personalized recommendations to farmers.
- The system includes bilingual support (English/Tamil) and geo-tagged pest monitoring for better agricultural decision-making across regions.

AgriCart – Agricultural E-Commerce Platform

January 2024 – June 2025

Client: Department of Agriculture, Tamil Nadu **Tech:** React.js, Redux, JavaScript, AWS S3, BillDesk Payment Gateway, AI Chat

- Built a full-featured e-commerce platform for Tamil Nadu Agricultural University offering seeds, fertilizers, and pesticides with BillDesk payment and S3 media integration.
- Applied advanced React patterns and Redux store management; integrated AI chat for customer support and product guidance.

Agre-X – Precision Crop Monitoring System

January 2023 – December 2023

Client: Telangana Government **Tech:** React.js, Redux, JavaScript, Remote Sensing APIs, Geospatial Analysis

- Delivered near real-time, high-resolution crop map products monitoring crop health, yield potential, and acreage for the Telangana state government.
- Integrated remote sensing and geospatial APIs; collaborated with data science teams for ML model integration.

Digitization of Cadastral Maps

April 2022 – December 2022

Client: FarmwiseAI Pvt Ltd **Tech:** React.js, JavaScript, GeoServer, OpenLayers (OLMap)

- Built a state-wide geo-referencing solution for Tamil Nadu sub-divisions using GeoServer and OpenLayers, integrating soil and land data into an interactive multi-layer map platform.

WRD – Water Resource Data Collection App

March 2021 – April 2022

Client: Water Resource Department, Tamil Nadu **Tech:** React Native, Redux, JavaScript, Google Maps API

- Developed a React Native mobile app for well water-level data collection with geofencing validation (100m radius); built admin web dashboard for district-wise analytics and hydrograph reporting.

Raven SiteBuilder – Enterprise Security Site Planning Platform

August 2019 – January 2021

Client: FLIR Systems (via Mitrahsoft Technologies) **Tech:** ColdFusion (CFML), CFCs, CF Scheduled Tasks, JavaScript, jQuery, Google Maps API, SQL

- Maintained and supported Raven SiteBuilder, a mission-critical thermal security camera simulation and site planning platform for FLIR Systems — responsible for ongoing bug fixes, enhancements, and stability of existing CFC architecture, CF REST APIs, and cfquery integrations.
- Monitored system performance, resolved production defects, performed regular updates for Google Maps API compatibility, and ensured 99%+ application uptime per FLIR Systems SLA requirements.

E D U C A T I O N

Bachelor of Technology (BTech) – Information Technology

March 2019

Thiagarajar College of Engineering, Madurai, Tamil Nadu

A W A R D S & A C H I E V E M E N T S

- Innovation and Delivery Award – Recognized for implementing cutting-edge solutions that accelerated project delivery timelines and exceeded client expectations.
- On-Time Delivery of the Year Award – Honored for consistently meeting project deadlines with high-quality, production-ready outcomes across multiple government-scale projects.
